# Soft Computing in Communications (Studies in Fuzziness and Soft Computing)

## Soft Computing in Communications (Studies in Fuzziness and Soft Computing)

Soft computing, as opposed to conventional "hard" computing, tolerates imprecision and uncertainty, in a way very much similar to the human mind. Soft computing techniques include neural networks, evolutionary computation, fuzzy logic, and chaos. The recent years have witnessed tremendous success of these powerful methods in virtually all areas of science and technology, as evidenced by the large numbers of research results published in a variety of journals, conferences, as well as many excellent books in this book series on Studies in Fuzziness and Soft Computing. This volume is dedicated to recent novel applications of soft computing in communications. The book is organized in four Parts, i.e., (1) neural networks, (2) evolutionary computation, (3) fuzzy logic and neurofuzzy systems, and (4) kernel methods. Artificial neural networks consist of simple processing elements called neurons, which are connected by weights that may be adjusted during learning. Part 1 of the book has seven chapters, demonstrating some of the capabilities of two major types of neural networks, i.e., multi-layer perceptron (MLP) neural networks and Hopfield-type neural networks.

### **From reader reviews:**

#### **Joshua Ricker:**

What do you regarding book? It is not important together with you? Or just adding material when you need something to explain what your own problem? How about your free time? Or are you busy individual? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? All people has many questions above. They should answer that question because just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this specific Soft Computing in Communications (Studies in Fuzziness and Soft Computing) to read.

#### **Angela Hampton:**

Now a day those who Living in the era wherever everything reachable by interact with the internet and the resources within it can be true or not demand people to be aware of each data they get. How individuals to be smart in acquiring any information nowadays? Of course the solution is reading a book. Reading through a book can help people out of this uncertainty Information especially this Soft Computing in Communications (Studies in Fuzziness and Soft Computing) book because book offers you rich facts and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it you may already know.

#### **Lou Whisenhunt:**

This book untitled Soft Computing in Communications (Studies in Fuzziness and Soft Computing) to be one of several books that will best seller in this year, honestly, that is because when you read this book you can get a lot of benefit into it. You will easily to buy this specific book in the book store or you can order it by means of online. The publisher of the book sells the e-book too. It makes you easier to read this book, because you can read this book in your Smartphone. So there is no reason for you to past this e-book from your list.

#### **Orville Hightower:**

People live in this new morning of lifestyle always attempt to and must have the spare time or they will get lots of stress from both lifestyle and work. So , whenever we ask do people have time, we will say absolutely yes. People is human not a robot. Then we consult again, what kind of activity are you experiencing when the spare time coming to an individual of course your answer will unlimited right. Then do you ever try this one, reading books. It can be your alternative in spending your spare time, the particular book you have read will be Soft Computing in Communications (Studies in Fuzziness and Soft Computing).
