Will looking to the stars increase your chances of being noticed by a man, and getting him to fall for you? Can horoscopes really give clues into a person's personality and preferences? Astrologers have been charting the stars and studying the zodiacs to try and make sense of human relationships since... well... forever. Over time, they have been able to identify patterns in human behavior (even answers to questions about our purpose and reasons for being) from understanding the position of the stars in the skies and the universe beyond our lonely planet. Using this immense knowledge harnessed through the zodiacs to learn about more about what your cute guy friend might prefer in his female counterpart is nothing short of prudent. If you've got your eye on a man who happened to be born under the Capricorn sign, this book will give you significant insight into his personality traits, strengths, weaknesses, and preferences. It's all tremendously valuable information that you can use to your advantage in getting him to fall for you. Additionally, this book provides a specific action plan to help you put your best foot forward. Ready to get started?
