Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) Sally Brooks

Biofortification – the enrichment of staple food crops with essential micronutrients – has been heralded as a uniquely sustainable solution to the problem of micronutrient deficiency or 'hidden hunger'. Considerable attention and resources are being directed towards the biofortification of rice – the world's most important food crop. Through an in-depth analysis of international rice biofortification efforts across the US, Philippines and China, this book provides an important critique of such goal-oriented, top-down approaches.

These approaches, the author argues, exemplify a model of global, 'public goods' science that is emerging within complex, international research networks. It provides vital lessons for those researching and making decisions about science and research policy, showing that if this model becomes entrenched, it is likely to channel resources towards the search for 'silver bullet' solutions at the expense of more incremental approaches that respond to locality, diversity and the complex and uncertain interactions between people and their environments. The author proposes a series of key changes to institutions and practices that might allow more context-responsive alternatives to emerge. These issues are particularly important now as increasing concerns over food security are leading donors and policy makers to commit to ambitious visions of 'impact at scale' – visions which may never become a reality and may preclude more effective pathways from being pursued. Published in association with the Economic and Social Research Council (ESRC).

From reader reviews:

Mary Lee:

What do you concentrate on book? It is just for students since they are still students or this for all people in the world, the particular best subject for that? Just you can be answered for that concern above. Every person has several personality and hobby for every single other. Don't to be pressured someone or something that they don't want do that. You must know how great and also important the book Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability). All type of book could you see on many methods. You can look for the internet sources or other social media.

Melissa Gusman:

Book is to be different for every single grade. Book for children until finally adult are different content. As it is known to us that book is very important for us. The book Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) seemed to be making you to know about other know-how and of course you can take more information. It is quite advantages for you. The guide Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) is not only giving you much more new information but also to become your friend when you feel bored. You can spend your current spend time to read your reserve. Try to make relationship together with the book Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability). You never truly feel lose out for everything in the event you read some books.

Chris Walker:

This Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) is brand new way for you who has fascination to look for some information as it relief your hunger of knowledge. Getting deeper you on it getting knowledge more you know or perhaps you who still having little digest in reading this Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability) can be the light food for you personally because the information inside this specific book is easy to get by anyone. These books build itself in the form which is reachable by anyone, yes I mean in the e-book application form. People who think that in reserve form make them feel drowsy even dizzy this e-book is the answer. So there isn't any in reading a guide especially this one. You can find actually looking for. It should be here for you actually. So , don't miss that! Just read this e-book sort for your better life as well as knowledge.

Jerry Jackman:

What is your hobby? Have you heard that question when you got students? We believe that that problem was given by teacher for their students. Many kinds of hobby, All people has different hobby. Therefore you know that little person similar to reading or as examining become their hobby. You must know that reading is very important and book as to be the factor. Book is important thing to increase you knowledge, except

your own teacher or lecturer. You discover good news or update in relation to something by book. Amount types of books that can you go onto be your object. One of them is this Rice Biofortification: Lessons for Global Science and Development (Pathways to Sustainability).
