The Religious Culture of the Huguenots, 1660-1750

The Religious Culture of the Huguenots, 1660-1750

Recent years have witnessed a revival of interest in the history of the Huguenots, and new research has increased our understanding of their role in shaping the early modern world. Yet whilst much has been written about the Huguenots during the sixteenth-century wars of religion, much less is known about their history in the following centuries. The ten essays in this collection provide the first broad overview of Huguenot religious culture from the Restoration of Charles II to the outbreak of the French Revolution. Dealing primarily with the experiences of Huguenots in England and Ireland, the volume explores issues of conformity and nonconformity, the perceptions of 'refuge', and Huguenot attitudes towards education, social reform and religious tolerance. Taken together they offer the most comprehensive and up-to-date survey of Huguenot religious identity in the seventeenth and eighteenth centuries.
