Clinical Guide to Pharmacotherapeutics for the Primary Care Provider 2005/2006 Mari J Wirfs, Amelie Hollier

Clinical Guide to Pharmacotherapeutics for the Primary Care Provider is a prescribing reference intended for use by physicians, nurse practitioners, advanced RNs, physician assistants and other primary care providers. This Clinical Guide is arranged by diagnosis with each commonly prescribed medication listed and explained. The bulleted format allows for quick and easy access to current comprehensive information. Comments are interspersed throughout, including such clinically useful information as laboratory values to be monitored, patient teaching points, and safety information.

The guide is divided into two sections. Section I presents pharmacotherapy regimens for over 300 clinical diagnoses. Section II presents clinically useful information in convenient table format, including: the JNC-VII recommendations for hypertension management, descriptions of the U.S. schedule of controlled substances and FDA pregnancy categories, measurement conversions, childhood and adult immunization recommendations, brand-name drugs (with contents) for the management of common respiratory symptoms, anti-infectives by classification, pediatric dosing by weight for liquid forms, glucocorticosteroids by route of administration, contraceptives by route of administration and estrogen and/or progesterone content, and brand-name adult, pediatric, and prenatal vitamin and mineral supplements (with contents). An alphabetical cross reference index of drugs by generic and brand name, with FDA pregnancy category and controlled drug schedule, facilitates quick identification of drugs by alternate names and relative safety during pregnancy.
