## **Brain and Perception: Holonomy and Structure in Figural Processing (Distinguished Lecture Series)**

Karl H. Pribram

Presented as a series of lectures, this important volume achieves four major goals:

- 1) It integrates the results of the author's research as applied to pattern perception -- reviewing current brain research and showing how several lines of inquiry have been converging to produce a paradigm shift in our understanding of the neural basis of figural perception.
- 2) It updates the holographic hypothesis of brain function in perception.
- 3) It emphasizes the fact that both distributed (holistic) and localized (structural) processes characterize brain function.
- 4) It portrays a neural systems analysis of brain organization in figural perception by computational models - - describing processing in terms of formalisms found useful in ordering data in 20th-century physical and engineering sciences.

The lectures are divided into three parts: a Prolegomenon outlining a theoretical framework for the presentation; Part I dealing with the configural aspects of perception; and Part II presenting its cognitive aspects. The appendices were developed in a collaborative effort by the author, Kunio Yasue, and Mari Jibu (both of Notre Dame Seishin University of Okayama, Japan).

### **From reader reviews:**

#### **Maureen Guzman:**

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite guide and reading a reserve. Beside you can solve your problem; you can add your knowledge by the book entitled Brain and Perception: Holonomy and Structure in Figural Processing (Distinguished Lecture Series). Try to make book Brain and Perception: Holonomy and Structure in Figural Processing (Distinguished Lecture Series) as your buddy. It means that it can to get your friend when you sense alone and beside associated with course make you smarter than previously. Yeah, it is very fortunated for yourself. The book makes you far more confidence because you can know almost everything by the book. So , let us make new experience along with knowledge with this book.

#### **Helen Johnson:**

Do you among people who can't read satisfying if the sentence chained within the straightway, hold on guys this aren't like that. This Brain and Perception: Holonomy and Structure in Figural Processing (Distinguished Lecture Series) book is readable by you who hate those straight word style. You will find the information here are arrange for enjoyable reading experience without leaving possibly decrease the knowledge that want to supply to you. The writer associated with Brain and Perception: Holonomy and Structure in Figural Processing (Distinguished Lecture Series) content conveys prospect easily to understand by lots of people. The printed and e-book are not different in the content but it just different as it. So , do you continue to thinking Brain and Perception: Holonomy and Structure in Figural Processing (Distinguished Lecture Series) is not loveable to be your top checklist reading book?

#### **Margo Soares:**

Playing with family inside a park, coming to see the water world or hanging out with pals is thing that usually you will have done when you have spare time, after that why you don't try point that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Brain and Perception: Holonomy and Structure in Figural Processing (Distinguished Lecture Series), it is possible to enjoy both. It is great combination right, you still want to miss it? What kind of hangout type is it? Oh seriously its mind hangout people. What? Still don't buy it, oh come on its referred to as reading friends.

#### **Edward Franco:**

This Brain and Perception: Holonomy and Structure in Figural Processing (Distinguished Lecture Series) is great guide for you because the content that is certainly full of information for you who else always deal with world and possess to make decision every minute. This specific book reveal it details accurately using great plan word or we can declare no rambling sentences inside. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only offers you straight forward sentences but hard core information with

attractive delivering sentences. Having Brain and Perception: Holonomy and Structure in Figural Processing (Distinguished Lecture Series) in your hand like keeping the world in your arm, facts in it is not ridiculous one. We can say that no book that offer you world throughout ten or fifteen moment right but this publication already do that. So , it is good reading book. Hey Mr. and Mrs. occupied do you still doubt in which?
