Welcome to the World of Day Trading!

The purpose of this book is to introduce you to the world of day trading. But we'll go deeper than that. We're going to get at key concepts as well as a philosophy of trading stocks that many traders fail to realize when they start out on their own.

The concepts and ideas presented in this book can end up saving you thousands of dollars if you will simply listen to someone who has gone before you.

You see, I've been trading stocks for a very long time. I've had the good fortune to help thousands of students learn how to profit from the trading of stocks. From their letters and emails, and by talking with them at national trader conferences, I know how

difficult it is for new traders to get started on the right foot. And I want to shorten your learning curve.

There is no need for you to repeat the same mistakes that thousands of other traders have made before you. So part of the goal of this book is to tell you where other traders have made mistakes so you don't have to repeat them. There is no secret society here where only a small handful of traders really know how to do this thing called day trading.

Instead, you'll find the world of stock trading to be filled with generous people who are willing to share their time, ideas, and support with you. So, if you are new to the world of day trading, then this could be your first step toward a whole new universe.

As a scholar, I exactly feel bored to help with reading. If their teacher requested them to go to the library as well as to make a summary for some e-book, they are complained. Just tiny students that have reading's heart and soul or real interest. They just do what the instructor wants, like asked to go to the library. They go to the library right now but nothing is read critically. Any student feels that looking at it is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to be complicated. A book is very important for yourself. As we know that on this period of time, many ways to get whatever we really wish for.
