Nonclinical Assessment of Abuse Potential for New Pharmaceuticals

Nonclinical Assessment of Abuse Potential for New Pharmaceuticals

Nonclinical Assessment of Abuse Potential for New Pharmaceuticals offers a complete reference on the current international regulatory guidelines and details best practice methodology for the three standard animal models used to evaluate abuse potential: physical dependence, self-administration and drug discrimination. This book also includes chapters on alternative models and examples of when you should use these alternatives. Case histories are provided at the end of the book to show how the data generated from the animal models play a pivotal role in the submission package for a new drug. By incorporating all of this information into one book, *Nonclinical Assessment of Abuse Potential for New Pharmaceuticals* is your single resource for everything you need to know to understand and implement the assessment of abuse liability.

- Provides a consolidated overview of the complex regulatory landscape
- Offers best practice methodology for conducting animal studies, including selection of doses and positive control agents that will help you improve your own abuse potential studies
- Includes real-life examples to illustrate how nonclinical data fit into the submission strategy
