Precalculus: A Graphing Approach

Raymond A. Barnett, Michael R. Ziegler, Karl E Byleen

Precalculus: A Graphing Approach Raymond A. Barnett, Michael R. Ziegler, Karl E Byleen
Mathematical reform is the driving force behind the organization and development of this new precalculus text. The use of technology, primarily graphing utilities, is assumed throughout the text. The development of each topic proceeds from the concrete to the abstract and takes full advantage of technology, wherever appropriate.

The first major objective of this book is to encourage students to investigate mathematical ideas and processes graphically and numerically, as well as algebraically. Proceeding in this way, students gain a broader, deeper, and more useful understanding of a concept or process. Even though concept development and technology are emphasized, manipulative skills are not ignored, and plenty of opportunities to practice basic skills are present. A brief look at the table of contents will reveal the importance of the function concept as a unifying theme.

The second major objective of this book is the development of a library of elementary functions, including their important properties and uses. Having this library of elementary functions as a basic working tool in their mathematical tool boxes, students will be able to move into calculus with greater confidence and understanding. In addition, a concise review of basic algebraic concepts is included in Appendix A for easy reference, or systematic review. The third major objective of this book is to give the student substantial experience in solving and modeling real world problems. Enough applications are included to convince even the most skeptical student that mathematics is really useful. Most of the applications are simplified versions of actual real-world problems taken from professional journals and professional books. No specialized experience is required to solve any of the applications.

From reader reviews:

Verline Custer:

This book untitled Precalculus: A Graphing Approach to be one of several books this best seller in this year, that is because when you read this book you can get a lot of benefit upon it. You will easily to buy this particular book in the book shop or you can order it by way of online. The publisher with this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Smart phone. So there is no reason for your requirements to past this book from your list.

Ruth Aguilar:

Precisely why? Because this Precalculus: A Graphing Approach is an unordinary book that the inside of the e-book waiting for you to snap the item but latter it will zap you with the secret that inside. Reading this book next to it was fantastic author who have write the book in such amazing way makes the content within easier to understand, entertaining way but still convey the meaning totally. So , it is good for you because of not hesitating having this ever again or you going to regret it. This amazing book will give you a lot of advantages than the other book include such as help improving your expertise and your critical thinking technique. So , still want to hold off having that book? If I have been you I will go to the publication store hurriedly.

Katrina Varga:

It is possible to spend your free time to see this book this e-book. This Precalculus: A Graphing Approach is simple bringing you can read it in the recreation area, in the beach, train and soon. If you did not have much space to bring typically the printed book, you can buy the e-book. It is make you simpler to read it. You can save typically the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Richard Perkins:

As we know that book is essential thing to add our information for everything. By a reserve we can know everything we wish. A book is a range of written, printed, illustrated or perhaps blank sheet. Every year ended up being exactly added. This book Precalculus: A Graphing Approach was filled regarding science. Spend your extra time to add your knowledge about your technology competence. Some people has distinct feel when they reading some sort of book. If you know how big benefit of a book, you can really feel enjoy to read a book. In the modern era like now, many ways to get book that you just wanted.
