Mathematical Optimization and Economic Analysis (Springer Optimization and Its Applications)

Mikulás Luptácik

Mathematical Optimization and Economic Analysis (Springer Optimization and Its Applications) Mikulás Luptácik

"Mathematical Optimization and Economic Analysis" is a self-contained introduction to various optimization techniques used in economic modeling and analysis such as geometric, linear, and convex programming and data envelopment analysis. Through a systematic approach, this book demonstrates the usefulness of these mathematical tools in quantitative and qualitative economic analysis.

The book presents specific examples to demonstrate each technique's advantages and applicability as well as numerous applications of these techniques to industrial economics, regulatory economics, trade policy, economic sustainability, production planning, and environmental policy.

Key Features include:

- A detailed presentation of both single-objective and multiobjective optimization;
- An in-depth exposition of various applied optimization problems;
- Implementation of optimization tools to improve the accuracy of various economic models;
- Extensive resources suggested for further reading.

This book is intended for graduate and postgraduate students studying quantitative economics, as well as economics researchers and applied mathematicians. Requirements include a basic knowledge of calculus and linear algebra, and a familiarity with economic modeling.

From reader reviews:

Thomas Llanos:

Do you one among people who can't read pleasant if the sentence chained from the straightway, hold on guys that aren't like that. This Mathematical Optimization and Economic Analysis (Springer Optimization and Its Applications) book is readable simply by you who hate the straight word style. You will find the information here are arrange for enjoyable reading experience without leaving even decrease the knowledge that want to give to you. The writer associated with Mathematical Optimization and Economic Analysis (Springer Optimization and Its Applications) content conveys the thought easily to understand by most people. The printed and e-book are not different in the articles but it just different such as it. So , do you still thinking Mathematical Optimization and Its Applications) is not loveable to be your top listing reading book?

Nancy Hedrick:

Reading a e-book can be one of a lot of task that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a publication will give you a lot of new data. When you read a reserve you will get new information since book is one of a number of ways to share the information or their idea. Second, reading through a book will make anyone more imaginative. When you studying a book especially hype book the author will bring you to imagine the story how the people do it anything. Third, you can share your knowledge to others. When you read this Mathematical Optimization and Economic Analysis (Springer Optimization and Its Applications), you are able to tells your family, friends in addition to soon about yours guide. Your knowledge can inspire the others, make them reading a book.

Robert Watts:

Reading can called brain hangout, why? Because if you are reading a book particularly book entitled Mathematical Optimization and Economic Analysis (Springer Optimization and Its Applications) your head will drift away trough every dimension, wandering in every aspect that maybe not known for but surely might be your mind friends. Imaging each and every word written in a book then become one form conclusion and explanation which maybe you never get just before. The Mathematical Optimization and Economic Analysis (Springer Optimization and Its Applications) giving you another experience more than blown away your thoughts but also giving you useful facts for your better life on this era. So now let us show you the relaxing pattern here is your body and mind will probably be pleased when you are finished reading it, like winning a sport. Do you want to try this extraordinary paying spare time activity?

Duane Vega:

Many people spending their time period by playing outside with friends, fun activity having family or just watching TV all day every day. You can have new activity to enjoy your whole day by reading through a

book. Ugh, you think reading a book will surely hard because you have to use the book everywhere? It ok you can have the e-book, having everywhere you want in your Smartphone. Like Mathematical Optimization and Economic Analysis (Springer Optimization and Its Applications) which is obtaining the e-book version. So , try out this book? Let's observe.
