Engineering Special Publication 25 - Hot Deserts: Engineering, Geology and Geomorphology: Engineering Group Working Party Report (Geological Society Engineering Geology Special Publications) M. J. Walker

This volume provides an authoritative and comprehensive state-of-the-art review of hot desert terrains in all parts of the world, their geomaterials and influence on civil engineering site investigation, design and construction. It primarily covers conditions and materials in modern hot deserts, but there is also coverage of unmodified ancient desert soils that exhibit engineering behaviour similar to modern desert materials. Thorough and up-to-date guidance on modern field evaluation and ground investigation techniques in hot arid areas is provided, including reference to a new approach to the desert model and detailed specialised assessments of the latest methods for materials characterisation and testing.

The volume is based on world-wide experience in hot desert terrain and draws upon the knowledge and expertise of the members of a Geological Society Engineering Group Working Party comprising practising geologists, geomorphologists and civil engineers with a wealth of varied, but complementary experience of working in hot deserts.

It is an essential reference book for professionals, as well as a valuable textbook for students. It is written in a style that is accessible to the non-specialist. A comprehensive glossary is also included.

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides

From reader reviews:

Neil Turner:

Here thing why this specific Engineering Special Publication 25 - Hot Deserts: Engineering, Geology and Geomorphology: Engineering Group Working Party Report (Geological Society Engineering Geology Special Publications) are different and reputable to be yours. First of all studying a book is good nonetheless it depends in the content than it which is the content is as delicious as food or not. Engineering Special Publication 25 - Hot Deserts: Engineering, Geology and Geomorphology: Engineering Group Working Party Report (Geological Society Engineering Geology Special Publications) giving you information deeper since different ways, you can find any e-book out there but there is no guide that similar with Engineering Special Publication 25 - Hot Deserts: Engineering, Geology and Geomorphology: Engineering Group Working Party Report (Geological Society Engineering Geology Special Publications). It gives you thrill looking at journey, its open up your own personal eyes about the thing which happened in the world which is maybe can be happened around you. It is possible to bring everywhere like in recreation area, café, or even in your method home by train. Should you be having difficulties in bringing the imprinted book maybe the form of Engineering Special Publication 25 - Hot Deserts: Engineering, Geology and Geomorphology: Engineering Group Working Party Report (Geological Society Engineering Geology Special Publications) in e-book can be your alternative.

Colleen Key:

A lot of people always spent all their free time to vacation as well as go to the outside with them family or their friend. Do you realize? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. If you enjoy the book you read you can spent the whole day to reading a e-book. The book Engineering Special Publication 25 - Hot Deserts: Engineering, Geology and Geomorphology: Engineering Group Working Party Report (Geological Society Engineering Geology Special Publications) it is rather good to read. There are a lot of individuals who recommended this book. We were holding enjoying reading this book. When you did not have enough space to bring this book you can buy the particular e-book. You can m0ore quickly to read this book from the smart phone. The price is not too costly but this book offers high quality.

Mary Logsdon:

You could spend your free time to read this book this publication. This Engineering Special Publication 25 - Hot Deserts: Engineering, Geology and Geomorphology: Engineering Group Working Party Report (Geological Society Engineering Geology Special Publications) is simple to develop you can read it in the area, in the beach, train and soon. If you did not have much space to bring the particular printed book, you can buy the e-book. It is make you quicker to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Stephen Galvan:

This Engineering Special Publication 25 - Hot Deserts: Engineering, Geology and Geomorphology: Engineering Group Working Party Report (Geological Society Engineering Geology Special Publications) is a fresh way for you who has curiosity to look for some information since it relieves your hunger for information. Getting deeper you on it getting knowledge more you know otherwise you who still having little bit of digest in reading this Engineering Special Publication 25 - Hot Deserts: Engineering, Geology and Geomorphology: Engineering Group Working Party Report (Geological Society Engineering Geology Special Publications) can be the light food for yourself because the information inside that book is easy to get by means of anyone. These books acquire itself in the form that is reachable by anyone, yep I mean in the e-book application form. People who think that in e-book form make them feel sleepy even dizzy this e-book is the answer. So you cannot find any in reading a guide especially this one. You can find what you are looking for. It should be here for anyone. So, don't miss the idea! Just read this e-book variety for your better life and knowledge.
