Dynamics in Models of Coarsening, Coagulation, Condensation and Quantization (Lecture Notes Series, Institute for Mathematical Sciences, N) (Lecture Note Series)

Weizhu Bao, Jian-Guo Liu

Dynamics in Models of Coarsening, Coagulation, Condensation and Quantization (Lecture Notes Series, Institute for Mathematical Sciences, N) (Lecture Note Series) Weizhu Bao, Jian-Guo Liu

The Institute for Mathematical Sciences at the National University of Singapore hosted a research program on "Nanoscale Material Interfaces: Experiment, Theory and Simulation" from November 2004 to January 2005. As part of the program, tutorials for graduate students and junior researchers were given by leading experts in the field. This invaluable volume collects the expanded lecture notes of four of those self-contained tutorials. The topics covered include dynamics in different models of domain coarsening and coagulation and their mathematical analysis in material sciences; a mathematical and computational study for quantized vortices in the celebrated Ginzburg Landau models of superconductivity and the mean field Gross Pitaevskii equations of superfluidity; the nonlinear Schrödinger equation and applications in Bose Einstein condensation and plasma physics as well as their efficient and accurate computation; and finally, an introduction to constitutive modeling of macromolecular fluids within the framework of the kinetic theory. This volume serves to inspire graduate students and researchers who will embark upon original research work in these fields.

From reader reviews:

Kenneth Wallace:

The book Dynamics in Models of Coarsening, Coagulation, Condensation and Quantization (Lecture Notes Series, Institute for Mathematical Sciences, N) (Lecture Note Series) can give more knowledge and information about everything you want. So just why must we leave the great thing like a book Dynamics in Models of Coarsening, Coagulation, Condensation and Quantization (Lecture Notes Series, Institute for Mathematical Sciences, N) (Lecture Note Series)? Some of you have a different opinion about publication. But one aim this book can give many information for us. It is absolutely right. Right now, try to closer using your book. Knowledge or information that you take for that, you are able to give for each other; it is possible to share all of these. Book Dynamics in Models of Coarsening, Coagulation, Condensation and Quantization (Lecture Notes Series, Institute for Mathematical Sciences, N) (Lecture Note Series) has simple shape but you know: it has great and massive function for you. You can search the enormous world by available and read a guide. So it is very wonderful.

Aaron Covington:

The book untitled Dynamics in Models of Coarsening, Coagulation, Condensation and Quantization (Lecture Notes Series, Institute for Mathematical Sciences, N) (Lecture Note Series) is the reserve that recommended to you to read. You can see the quality of the guide content that will be shown to you actually. The language that publisher use to explained their ideas are easily to understand. The article author was did a lot of exploration when write the book, to ensure the information that they share to your account is absolutely accurate. You also can get the e-book of Dynamics in Models of Coarsening, Coagulation, Condensation and Quantization (Lecture Notes Series, Institute for Mathematical Sciences, N) (Lecture Note Series) from the publisher to make you far more enjoy free time.

Donna Hufnagel:

Many people spending their time period by playing outside using friends, fun activity using family or just watching TV the entire day. You can have new activity to pay your whole day by studying a book. Ugh, think reading a book can actually hard because you have to accept the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Cell phone. Like Dynamics in Models of Coarsening, Coagulation, Condensation and Quantization (Lecture Notes Series, Institute for Mathematical Sciences, N) (Lecture Note Series) which is getting the e-book version. So , try out this book? Let's view.

Martin Herrin:

What is your hobby? Have you heard this question when you got students? We believe that that problem was given by teacher to their students. Many kinds of hobby, All people has different hobby. And you know that little person similar to reading or as reading become their hobby. You should know that reading is very

important in addition to book as to be the issue. Book is important thing to provide you knowledge, except your own teacher or lecturer. You see good news or update concerning something by book. Amount types of books that can you choose to adopt be your object. One of them is Dynamics in Models of Coarsening, Coagulation, Condensation and Quantization (Lecture Notes Series, Institute for Mathematical Sciences, N) (Lecture Note Series).
